

My Mini Business

Money Guide

For Young Entrepreneurs Ages 12–15

 Group of 5

 Make Profit!

Phase 2: Financial Planning

[MONEY GUIDE]

What Is Your Mini Business?

FIND raw materials

Things you need to make your product

PACK it nicely

Wrap it so it looks great

PRODUCE your product

Make it with care and quality

SELL at fairs & markets

Set up a booth and get customers!

You start with RM300 — spend it wisely to make MORE money!

Mission #1 → Know Your Business

1

What product will you sell?

Identify the product.

2

Why do you want to sell this product?

Give the reason.

3

How to make this products?

Find on YouTube or Google or ChatGPT.

Report to your head!

How to Produce Your Product

1

Plan It

Decide **WHAT** you're making, **HOW MANY** pieces, and **WHO** does each job

2

Get Materials

Buy only what you need based on your list — compare prices first!

3

Clean & Prepare

Wash hands, clean surfaces, prepare all tools and ingredients

4

Make It!

Follow the recipe carefully. Taste-test or check quality!

5

Check Quality

Is it good enough to sell? Would **YOU** buy it? Fix any problems.

6

Count & Record

Write down how many items you made — you'll need this for pricing

Mission 2 → How Will You Make It?

15 min

1

What are the steps?

Write step 1 → - - - -, step 2 → - - - -, etc.

2

How many people are needed?

No. of Team-mate

3

How long does it take?

Give the time.

Report to your head!

Step 1: Find Your Raw Materials

Example: Selling Cookies

Flour — RM3.50

Butter — RM5.00

Sugar — RM2.50

Eggs — RM4.00

Chocolate chips — RM6.00

Salt — RM0.50

Packaging bags — RM5.00

TOTAL: RM26.50

Your List:

Ingredient / Material	Amount	Cost (RM)

TIP: Write down EVERY single ingredient + its cost before you start buying!

Save Money: Get Free Materials!

Smart entrepreneurs find ways to REDUCE costs. Here's how:

Ask family first!

Check home kitchen or garden for ingredients before buying

Share with other groups

Split a big pack of sugar — costs less per group

Reuse & recycle

Use old jars, boxes, or cloth as packaging instead of buying new

Buy in bulk

Bigger packs are cheaper per unit (e.g. 1kg flour vs 500g)

Ask neighbours / relatives

Many people are happy to donate small amounts to help kids!

Grow your own

Herbs, pandan leaves, or chillies can be grown for free

The less you spend on materials, the MORE profit you keep!

Make It Look Amazing!

Good packaging makes customers WANT to buy your product:

Your Package MUST have:

- ✓ Product name (e.g. 'Cookies by Team Bintang')
- ✓ List of ingredients
- ✓ How many are inside
- ✓ Price tag
- ✓ Your group name or logo
- ✓ Keep Clean / Handle With Care (if needed)

Low-Cost Packaging Ideas:

-  Zip-lock bags — Cheap & clean
-  Ribbon & sticker label — Pretty & low cost
-  Kraft paper wrap — Eco-friendly look
-  Old food containers — Cleaned & reused = FREE
-  Hand-drawn labels — Shows creativity!

Nice packaging = customers trust you MORE = better sales!

Decorate Your Booth!

Big Sign / Banner

Write your business name BIG so people can see it from far away. Use bright colours!

Flowers / Decor

Fresh flowers, ribbons, or balloons make your booth look attractive and fun!

Neat Display

Arrange your products neatly. Taller at the back, shorter in front so all products are visible

Clear Price Tags

Put BIG, easy-to-read price tags on everything. Customers don't like asking 'how much?'

Team Uniform

Wear matching colours or t-shirts — looks professional and people will remember you!

Call Out / Samples

Offer a small free sample or say 'Hello! Would you like to try?' to attract customers

Mission 3 → Materials Hunt

20 min

1

List the materials to make the products.

Write down the item names and number.

2

Categorize the items you can get free.

Write down item names and number.

3

Categorize the items you may need to buy.

Write the name and price

Report to your head!

Money Words You Must Know

REVENUE

ALL the money you collect from selling

e.g. Sell 30 cookies $\times$ RM2 = RM60 Revenue

EXPENSES

ALL the money you SPEND to make your product

e.g. Flour + butter + bags = RM26.50 Expenses

PROFIT

Money LEFT after paying all expenses

*e.g. RM60 Revenue – RM26.50 Expenses = RM33.50
Profit*

CAPITAL

The starting money given to you

Your RM300 is your Capital

More Money Words

COST PRICE

How much it costs YOU to make 1 item

RM26.50 ÷ 30 cookies = RM0.88 per cookie

SELLING PRICE

How much you charge the customer

You sell each cookie for RM2.00

BUDGET

A plan for how to spend your money

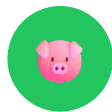

Plan: RM20 materials + RM5 packaging + RM5 decoration

LOSS

When expenses are MORE than revenue

Spent RM60 but only sold RM40 = RM20 Loss 😞

SAVINGS

Money you keep / don't spend

Save some profit to buy more materials next round!

RECORD

Writing down every ringgit in and out

Keep a notebook — write EVERY transaction!

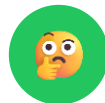

Smart Money Habits

Follow these habits to be a GREAT money manager:

Record EVERY ringgit

Write it down IMMEDIATELY — don't rely on memory!

Ask: Do we NEED this?

Before buying anything, ask if it is absolutely necessary.

Reuse what you have

Look for free/recycled materials before spending money.

Set a spending limit

Decide: only RM___ on materials, RM___ on packaging.

Keep ALL receipts

A receipt is proof of every expense. Don't lose them!

Review after selling

At the end: what worked? What cost too much? Improve next time.

Good money habits now = financial success in the future!

How to Record Your Money

Write EVERY ringgit in a notebook or table — like this:

EXPENSES (Money Going OUT)

Date	Item	Amount (RM)
5 June	Flour & Sugar	6.00
5 June	Butter & Eggs	9.00
5 June	Packaging bags	5.00
6 June	Stickers	3.00
	TOTAL OUT	23.00

INCOME (Money Coming IN)

Date	What Sold	Amount (RM)
7 June	10 × cookies @RM2	20.00
7 June	15 × cookies @RM2	30.00
7 June	5 × cookies @RM2	10.00
	TOTAL IN	60.00

PROFIT = Total IN – Total OUT

RM60.00 – RM23.00 = RM37.00 PROFIT 🎉

The Big Money Formula

REVENUE

All money earned
from selling

—

EXPENSES

All money
you spent

=

PROFIT

What you
keep! 🎉

Example with RM300 Capital:

Revenue: 50 items × RM3 = RM150

Expenses: RM80 materials + RM15 packaging = RM95

Profit: RM150 – RM95 = RM55 🧑🏻🧑🏻

Your goal: Make your PROFIT as BIG as possible!

How to Set Your Selling Price

1

Find Cost Price

Divide total materials cost by number of items made

 $RM26.50 \div 30 \text{ cookies} = RM0.88 \text{ per cookie}$

2

Add Your Profit

Add how much profit you want per item (at least 50-100% more!)

 $RM0.88 \times 2 = RM1.76 \rightarrow \text{round to } RM2.00$

3

Check the Market

Look at what similar products cost nearby. Don't be too expensive!

 *If others sell cookies at RM2, your RM2 is fair!*

Price too low = less profit. Price too high = no customers. Find the sweet spot!

You Are Ready! Final Checklist

✓ I have my raw material LIST ready

✓ I know my BUDGET — how much to spend on each thing

✓ I have a step-by-step PRODUCTION plan

✓ My PACKAGING looks clean and has all the right info

✓ My BOOTH is decorated and easy to find

✓ I know what REVENUE, EXPENSES & PROFIT mean

✓ I have a NOTEBOOK to record every ringgit

✓ I know my SELLING PRICE and how I calculated it

✓ I found ways to get FREE or CHEAPER materials

✓ My team knows everyone's JOBS

YOU GOT THIS! Go make your mini biz a BIG SUCCESS!

Your RM300 Budget Plan

Here's one smart way to split your RM300 capital:

Raw Materials

Ingredients & supplies needed to make your product

60%

RM180

Packaging

Bags, boxes, labels, ribbons, tags

15%

RM45

Booth Decoration

Sign, tablecloth, display stand, decorations
